

3.) Traders are loving this one feature | Investmint 2.0

Hi Aishwarya,

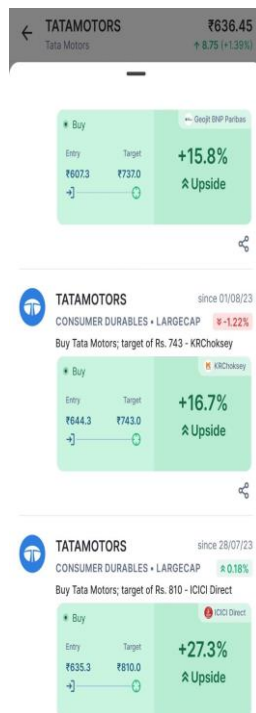

In my last email, I mentioned how with the new Investmint app, you can get A.I. generated 60-word news digest on stocks.

Today, I'll tell you about another new feature of ours, that market lovers (especially traders) are using.

Now, let's say you have a stock on your radar e.g. Tata Motors. While you do your analysis, it is always good to get some expert opinion as well.

With the new update, you can **see recommendations from the top 12 brokers on the stocks** that you have in mind.

So, for Tata Motors, it will show you something like this:

Seems like a good price to enter? Make a move then!

You can try it too, and see it in action.

Download the new app here:

Thanks,
Aakash
